

YOUR PERSONAL SEARCH AND RESCUE SERVICE

Search can no longer be perceived solely as a stand-alone application within the enterprise environment. It is increasingly interwoven into everything we do, and has quickly become the gateway to any and all information in the organization. The inability to rapidly find what you are looking for is frustrating, time consuming and reduces profitability. Businesses require customized search solutions the same way that a skilled mountain climber requires equipment and tools that are customized to their size, skill and task.

Characteristics of an effective, customized search application include:

- Expansive intranet and people search capabilities
- The ability to build search-driven applications
- Customization that meets your business requirements
- Accuracy that saves time and money
- A user-friendly and intuitive interface

CONQUER YOUR MOUNTAIN

WWW.SUMMIT7SYSTEMS.COM

Helping You Reach Your Peak Efficiency with the Right Enterprise Search Solution.

Summit 7 Systems can help identify your unique needs starting with your key business challenges and defining how to bring order to your chaos. In the Enterprise, line of business systems and information silos of user-created content hold data of tremendous value, but are disconnected from each other and more importantly, the users. Let us help you define your search strategy and create the right Enterprise Search solution that works best for you.

An effective Enterprise Search solution will:

-  Connect the right data to the right people at the right time
-  Leverage our proven processes and expertise
-  Utilize data from a myriad of file types and targeted repositories
-  Provide robust line of business integration

Summit 7 Systems is a team of mentors, guides, and experts that empower you to overcome any barrier between your business and success. We are a Microsoft Gold Certified Partner specializing in the Microsoft Business Productivity infrastructure. Summit 7 Systems designs systems that streamline collaboration, simplify data management, leverage social computing and optimize user experience. So, bring us your mountain and let us conquer it together.
